

Total

9th November 2020

The General Manager,
Total E&P,
Kampala (U)

0204916000

Dear Sir/Madame,

R.E. PETITION TO TOTAL, CNOOC AND OTHER OIL COMPANIES TO SAFEGUARD PEOPLE AND NATURE OVER THE EACOP, OTHER OIL PROJECTS

We, communities that have been affected by the Tilenga, East African Crude Oil Pipeline (EACOP), Kingfisher and other oil projects in Uganda, Tanzania and the Democratic Republic of Congo (DRC) in addition to stakeholders from all over the world, are concerned by the following:

- That under the Tilenga oil project, Total is planning to drill for oil in protected areas including in Murchison Falls National Park (MFNP), Uganda's largest, oldest and one of the most visited national parks. Total's activities are a threat to biodiversity conservation, tourism, community livelihoods, fisheries and Ugandans not to mention Tanzanians' natural heritage among others.
- In addition, that under the Tilenga and Kingfisher oil projects, Total and CNOOC are set to affect Lake Albert, River Nile and other important water resources through extracting for oil from Lake Albert, abstracting millions of cubic metres of water from Lake Albert and building an oil pipeline under River Nile. The above resources are sacred and highly important to millions of Ugandans, Congolese and citizens in the Nile Riparian countries. Communities' access to water, food from fish, incomes from the fisheries sector and others are dependent on conservation of the lake and river. Yet these are under threat!
- Furthermore, that under the EACOP oil project, Total, CNOOC, Uganda National Oil Company (UNOC) and the Tanzanian government proposed to construct about one third (460km) of the EACOP in the catchment of Lake Victoria. The lake is the pride of East Africans and the second largest freshwater lake in the world. Over 30 million people rely on the lake yet the EACOP has put it under threat of pollution. This is extremely unacceptable.
- In addition, that under or because of the EACOP oil project, Total, CNOOC and UNOC's EACOP oil activities have put over five protected areas, over seven Ramsar sites (wetlands

- of international importance) and the headwaters of over nine major lakes and rivers in Uganda, Tanzania, the DRC and others at risk of oil pollution or degradation.
- Some of the above-mentioned affected protected areas, wetlands, lakes and rivers include MFNP, Talawi open area, Ruiga River forest reserve in addition to the Murchison Falls-Albert Delta, Kagera, Lake Nabugabo, Lutembe Bay, Nabugabo and other wetland systems. Others include the headwaters of the Nile, Congo, Bahi, and Wami rivers in addition to the headwaters of lakes Victoria and Tanganyika. The rivers Kafu, Katonga and others have also not been spared. The environmental footprint of the EACOP project is too large and worrying.
- So is the estimated carbon footprint of the EACOP. At a time when Uganda, Tanzania and other countries are engaged in efforts to reduce their carbon emissions in line with the Paris Climate Change Agreement, the EACOP will hamper these efforts through the production of an estimated over 34.3 million metric tonnes of carbon per year when the crude oil transported by the pipeline is burnt.
- We are also highly concerned that the land rights of over 12,000 people in Uganda and Tanzania are being abused by Total and its partners under the EACOP project; Total is currently the lead developer on the project and is undertaking land acquisition activities. Land is the life and income source for communities. However, since 2018 and 2019, communities whose land was identified for acquisition for the EACOP project were stopped from using their land for key income-generating activities such as growing of perennial crops. This is unconstitutional, unjust and inhumane.
- It is notable that stopping the EACOP-affected people from using their land to grow perennial crops and set up new developments has bred poverty, food insecurity and has increased school drop-out rates, with girls being most affected. This is unacceptable.
- The affected people would like to have their grievances such as low compensation values, delayed compensation, stopping them from using their land including to bury their dead and others addressed. However, Total stopped engaging the affected people in September 2019, when the company suspended activities on the EACOP following a tax dispute with government. Affected communities are therefore stranded.
- Moreover, even when Total's contractors were engaging the affected communities, major gaps in the grievance handling mechanism were noted. These included failure to resolve grievances, conniving with the police to intimidate affected people who raised grievances, inciting insecurity against affected people who resisted low compensation and others.

- Today, the affected people are angry, frustrated and anxious because of the above-mentioned injustices against them.

IMPLICATIONS

Total, CNOOC and others' activities under the Tilenga, Kingfisher and EACOP oil projects are gravely impacting or stand to gravely impact food security, water access, biodiversity and environmental conservation, tourism, fisheries and other income-generating activities.

The mitigation measures that Total and CNOOC have provided under the Environmental and Social Impact Assessment (ESIA) reports for the above projects are inadequate. Moreover, we know that in Africa, oil companies rarely implement their proposed mitigation measures. Instead, they engage in the worst environmental and human rights abuses.

OUR CALL

Through this petition therefore, we are calling on Total, CNOOC, UNOC and other oil companies to do the following:

- i. End all oil and gas activities under the Tilenga, Kingfisher and EACOP oil projects in protected areas in Uganda and Tanzania.
- ii. In line with the ambitions under the Paris Climate Change Agreement and advice to stop new fossil fuel projects if the goal of the above agreement is to be met, prioritise investing in clean renewable energy as opposed to the Tilenga, Kingfisher, oil refinery and EACOP oil projects.
- iii. Clean renewable energy and other ecosensitive economic activities such as organic agriculture, tourism and others are the best option for Uganda as they safeguard jobs for the majority as opposed to oil and gas which will reportedly create only over 160,000 direct and indirect jobs. Amidst the above few jobs, millions of jobs in agriculture, tourism and others stand to be lost due to oil sector activities and climate change, which is linked to the oil industry.
- iv. Revalue the properties of the 5,000 people who have been affected by the EACOP project in Uganda so that the affected people can be paid compensation that is commensurate to the prevailing market rates. Fair and adequate compensation must be paid six months from the date of the re-valuation.
- v. Allow the affected people to grow crops and set up new developments which must be compensated for. The people must not be punished for Total's failure to pay them promptly as is provided for under Uganda's 1995 Constitution.
- vi. Finally, compensate the people for the income loss, psychological torture and other injustices caused due to failure to compensate them following the 2018 and 2019 cut-off-dates that were placed on their land.

**SIGNATORIES INCLUDING AFFECTED PERSONS AND NATIONAL, REGIONAL
AND INTERNATIONAL CSOS**
